

Winbex

**UPLIFTING
SOLUTIONS**

Saddle chairs help you to maintain an upright posture when sitting. Feet are placed flat on the floor at a greater width than conventional seating. The weight of the legs is taken through the feet; the upper body is stabilized accordingly. The pelvis is held securely in a natural position.

The Winbex saddle seat provides all the natural postural advantages of a saddle seat: the seat pan can be angle adjusted as well as height adjusted. The saddle itself is elongated and minimises discomfort sometimes associated with a "new" sitting position.

The Winbex is reasonably priced making it accessible to almost anyone seeking better stability and a more upright posture at work.
