

Cleo + Task Chair

The popular Cleo chair has been given a makeover with new features and performance = Cleo +! Now featuring dual density seat pan foam. Two types of foam are used in the chair padding – open cell which is more compressible, therefore softer; and closed cell, which is firmer. The dual layers utilise the structural advantages of both foam types, with the open cell foam layer closer to the body and the closed cell layer against the chair frame, providing increased user stability and comfort.

Features

- Fully ergo 3 lever mechanism
- Separate seat pan and back rest angle adjustment
- Adjustable back rest
- High density seat & back foam

Options

- Available in high or medium back
- Height adjustable arms
