

Conset

Electrical height adjustable desk

**UPLIFTING
SOLUTIONS**

The Conset electrical is a cost effective, height adjustable work desk designed for a sit-stand environment which manages to unite price and convenience by costing less than many other hand wind frames on the market.

Electrically operated height adjustable desks are the ideal solution for changing your working position quickly and easily. With the touch of a button electric operation allows users to adjust their desk height to suit their needs.

The adjustment is easy, fast, smooth, and quiet making this desk an ideal option for groups who share the same workstation (e.g. Hot Desking or shift working environments).

For users with existing back problems standing at a high desk for parts of the day rather than sitting all day at a standard desk can offer great relief and help the recovery process when back problems occur.
