

erTgo Desks

erTgo is a new range of multi-adjustable desks, allowing users to work comfortably from the same desk while sitting or standing.

Clever design of erTgo delivers a cost-effective solution where quick changes in working height are required. Allowing flexibility for both the task and the human requirement, erTgo is simple to operate.

Four different models of erTgo are available; the models differ in adjustability and weight carrying capacity. erTgo may be fixed, hand crank operated, technician adjustable or supplied with full electric motors.

The standard erTgo lifts up to 80kg.

A variety of desktop shapes are available for erTgo, including rectangular desks, 120 degree, or 180 degree configurations.

erTgo can also be fitted with castors and different panels, see overleaf for the range of Rapido workstations fitted with screens.
