

## CASE STUDY – Sydney Trains

---

### Customer Overview

### Monitoring trains on time

Sydney Trains have Uplifting monitor arms installed in dozens of signal boxes throughout the metropolitan network. The signal boxes typically operate in a 24/7 environment and the information on the monitors supported by Uplifting monitor arms is mission critical to monitoring and managing on-time train performance.

---

### The requirement

A wide variety of Uplifting monitor arm models are used including the 7Flex, 7500, and model 9183 and 9189 telescopic and point of sale monitor arms.
